

The Benefits of Pre-Wiring your Home for Solar Power

Prep Now, Save Later!

IES customers can opt into having their new home pre-plumbed for solar during the beginning stages of construction without interfering with the build time

1-855-44-SOLAR

www.iestxsolar.com

Cost Effective Solution

Pre Wire for solar during the construction and save money on the process after build.

No Aesthetic Compromise

Pre-plumbing during construction means everything can be hidden out of sight.

Roof Warranty

Pre-plumbing now will not have an effect on your roof warranty.

Equipment Location

You can choose to install the solar inverter in the garage, increasing equipment life.

A solar powered home means more savings and a smaller carbon footprint. Preparing for solar during the initial stages of construction enables you to make the future switch to solar simple and hassle free!

Reduced installation cost \$700
